

World Leaders in the Design and Manufacture of Marine Access Systems

We are specialists in aluminium gangways.

Established in 1934, Tyne Gangway has an extensive heritage in the manufacture of gangways and is the only specialist business of its kind in the UK.

From factory premises based on the banks of the River Tyne, Newcastle, we design and manufacture marine access systems including aluminium gangways, accommodation ladders, shore based pedestrian access equipment and bespoke structures.

Installing &
Servicing in

65+
COUNTRIES

85+
YEARS
of Knowledge
& Experience

We estimate to
have produced
302km
of gangways up to
the end of 2021

The business prides itself on providing excellent customer service and exceptional on time delivery to a worldwide customer base.

Tyne Gangway provides an in-house solution to meet customer needs, offering a comprehensive range of services including site surveys, design and fabrication, installation, inspection, certification, operator training, repair and maintenance.

SECTORS

CRUISE

SHIPBUILDERS

PORTS & HARBOURS

RENEWABLES

DEFENCE

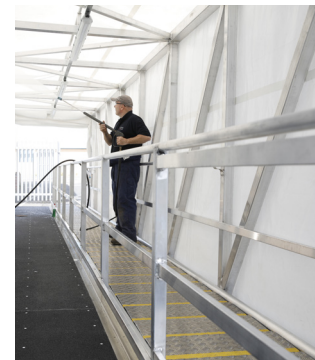

OFFSHORE OIL & GAS

We deliver exceptional quality products with **excellent customer service, on time, worldwide.** We are proud of what we do.

Tyne Gangway's dedicated design and engineering teams support the manufacturing process producing 2D and 3D drawing packages, allowing parties to visualise the product at the concept stage.

We pride ourselves in the quality of our service and our products. Our systems and processes are regularly audited and certified to ISO 9001:2015 and BS EN1090.

We provide a full fabrication and welding capability, employing time served fabricators and welders. The workshop is equipped with the latest synergic MIG welding equipment, to assist in producing higher quality welds.

REPAIR & MAINTENANCE

We are the only business of this kind in the UK.

Tyne Gangway products are manufactured with Marine Grade Aluminium, which is lighter than steel alternatives, and is low maintenance due to the self-healing oxidation process.

With a long history of providing marine access equipment to cruise and port operators, Tyne Gangway aim to continue connecting crew and cruise passengers to their port, efficiently and safely, via products that can be relied upon.

We provide an extensive range of marine access equipment that are adaptable to meet our customers' requirements and application:

- From our small bridges,
- through to our lightweight crane lifted, longer gangways,
- up to large articulated walkways for larger ports and vessels,
- as well as lightweight easy use canopy gangways,
- and dual use gangways with covered access, with an optional wheelchair access ramp.

TYPICAL SPECIFICATION

Custom design, aluminium gangway, 0-55 degrees working angle with length and width to suit customer requirements.

Standard supply:

- Manufactured from Marine Grade Lightweight Aluminium 6082 T6
- Clear width to suit customer requirement
- Length to suit customer requirement
- Anti-slip surface
- 0° to 55° working angle options
- Mild steel quay trolley for access & ship hook
- Fixed handrail with half-height.
- Lifting lugs.

Optional supply:

- Disabled access ramps
- Self-levelling tread step to maintain horizontal level
- Ship hook connection to suit customer vessel
- Weather protection cover on length of gangway
- Customer branded printed weather protection
- Turntable top platform for vessel connection and minimal quay landing restraints
- Lighting, sprinkler system provisions for customer pipework, services, etc.
- Inclometers
- Platform towers for height restricted applications
- Automatic – hydraulic deployed systems

Supported by our sister company,
Lift-Rite Engineering Services
 provide high quality lifting equipment,
 load testing and installation services.

Mission

To enhance the **connectivity** of people
 through the supply of dependable and
 innovative **gangways** and structures.

Vision

To expand our **international** brand,
renowned for solutions that meet
safety, operational and budget needs.

Values

Safety in our **Culture**
 Inclusiveness in our **Team**
 Pride in our **Craftsmanship**
 Responsiveness in our **Attitude**
 Adaptability in our **Innovations**
 Work-life harmony in our **behaviours**
 Social responsibility in our **Environment**
